PART TWO

Cultivating Your Emotional Intelligence

PART ONE: THE AGILE LEADER...a Path to Success

Effective leadership is essential to any organization's success. Leaders communicate the company vision and share information, influence the way work is done and are decision makers, motivate employees and are conduits to the rest of the organization. Effective leaders want to develop, motivate and retain their talent while being productive and meet the organization's goals.

In this exciting workshop, we explore how situational leaders adjust their leadership style according to the behavior and skill level of the employees and how this agility proves successful. It is practical, contemporary and focuses on both personal and professional development.
